### Meet the Magnums

Mr.

# Pedigree fog and haze from Martin

Martin brings you the Magnum family of products that can be used from the smallest mobile DJ to major international shows. Magnum fog and haze machines grow as you grow from small, entry-level fog machines to sophisticated DMX-controlled equipment.

The Magnum family uses the well known Jem technology and adds Martin's leadership in R&D, design, market presence, and renowned after sales service. resulting in reliable fog and haze machines that save you money many years ahead.

Martin Professional has a long association with fog and atmospheric effects technology in fact, Martin's first product in 1987 was an innovative fog machine, developed from a coffee machine

In 1996 Martin took over Jem. adding Jem's expertise with fog, heavy fog and haze machines to Martin's R&D strength and mass production facilities.

Today, Jem is the name of Martin's line of professional fog, heavy fog and haze products, while Magnum serves the end user market.

## Introducing...

…perfect density by the Magnum 650™

The smallest machine in the family, the Magnum 650 fog machine offers the perfect boost of dense white fog to enhance every light effect.

…the mid-range Magnum 850™

The big brother that adds the option of a remote control with timer functions and output level control.

…the heavy punch of the Magnum 1200™

With the option to add a DMX controller, the Magnum 1200 delivers a heavy punch of fog and is built tough to meet the rugged demands of 24/7 nightlife.

...high power from the **Magnum 1800**™

Highly flexible, the Magnum 1800 is built sleek and rugged, with massive output, a remote control, onboard DMX, and the option to fly the machine. The Magnum 1800 is a high-powered fogger suitable for any installation.

If you require even greater output, try our renowned **Magnum 2000™**.

…plug-and-play haze by the **Magnum 2500 Hz**™

Offering easy use and high performance, the Magnum 2500 Hz is the ideal choice for DJs, or when haze is needed in smaller venues, clubs, and bars. With a large fluid container and optional DMX, the Magnum 2500 Hz is ideal for installations.

Different fluid options for different applications	Yes	Yes	Yes	Yes	No

Martin is one of the world's largest fluid manufacturers, and our range of fluids is the widest and most popular range of atmosphere generating fog, haze, and heavy fog fluid around. Ideal for use in theatres, discos, clubs, concerts, festivals, and even television applications, our fluid is effective, safe and economical.

All fluids are environmentally-friendly and water-based. They are made from the highest quality food-grade polyfunctional alcohols which are diluted with water and purified by double reverse osmosis and an ultraviolet filtration process. This guarantees a virtually mineral- and bacteria-free product.

In addition, Martin supplies fluids with fragrance.
