

MDR-7500 Series
Professional
Headphones

For those who listen for a living.

Sony Professional headphones are engineered for a combination of strength, comfort and practicality, and are used daily in broadcast & recording studios worldwide. Designed to legendary standards of excellence, the MDR-7500 series is precision manufactured using the highest grade materials. All models fold to a convenient compact size. Headphones come complete with protective carry pouch, gold-plated Unimatch™ 3.5mm / 6.3mm adaptor, and service manual detailing spare parts available through Sony's dedicated professional service centres.

MDR-7509

Designed for critical listening applications, the **MDR-7509** represents the latest in headphone design & materials technology.

With an incredible 3,000 mW power handling capacity, the **MDR-7509** is the perfect studio monitoring headphone, capable of delivering a high SPL & dynamic range. The 50mm amorphous diamond driver creates transparent, powerful sound.

The Circum-aural design offers excellent isolation, making it ideal for outside broadcast, studio & DJ applications.

this is not a rehearsal.

SONY®

MDR-7506

The **MDR-7506** is an extremely high quality, unobtrusive reference headphone.

The **MDR-7506** has been engineered to be comfortable to wear for extended periods, making it ideal for use in broadcast & studio environments. A 40mm PET diaphragm and neodymium magnet ensure performance exceeding the requirements of digital sources such as CD, MD & DAT.

MDR-7502

A cost effective general purpose headphone. The lightweight closed design of the **MDR-7502** allows long term use without listening fatigue. The neodymium magnet (used in all Sony professional headphones) is five times more powerful than standard ferrite magnets, delivering dynamic sound, high sensitivity and deep bass response.

MDR-7505

Thanks to an acoustic design which positions the sound field very close to the ears, the **MDR-7505** makes detailed listening possible, even in noisy environments. An Auto-Swivel earpiece enables single sided monitoring. The 40mm PET driver & neodymium magnet ensure excellent sound quality & extended frequency response.

An adjustable, padded headband offers durability & comfort. Oxygen Free Copper cable is used to preserve signal quality.
